

# Y8 DT Parental Contribution

Dear Parent

During Y8 your son/daughter will get to build on their experiences in design and technology. The focus is on them developing their skills in the different material areas: food and nutrition; textiles; metalwork; plastics and wood. They will get to make a range of products that they will be able to bring home at the end of each rotation.

They may be asked to provide some of the ingredients for food and nutrition, we provide the store cupboards ingredients. We are asking for a contribution of £7 to enable us to offer the high quality projects and outcomes within DT. This should be paid via parent pay by October 1st by using following the link:

<http://www.parentpay.com/>

In addition we are able to offer access to free software that your child can access at home that will introduce them to 3D modelling and is supported by tutorials. The instructions for this will be shared using Edulink.

If your child receives Free School Meals, we do not expect a contribution. If you do not receive Free School Meals but are experiencing financial difficulty at the moment, please speak to your child's year manager in confidence. Please get in touch if you have any problems,

Helen Vardy  
Head of Design and Technology
