

BTEC LEVEL 3: HEALTH AND SOCIAL STUDIES

Summer Task 2019

See Justin Bieber's life stages in the image below;

Example: Justin Bieber

Unit 4: Development through Life Stages

The diagram shows a horizontal timeline with an arrow pointing right. Below the arrow are five life stages with corresponding age ranges: Infancy (0-3), Childhood (4-9), Adolescence (10-18), Adulthood (19-65), and Older Adulthood (65+). Above the arrow are four photographs of Justin Bieber: a baby, a young child with a teddy bear, a teenager, and an adult.

Life stages:

| | |
|-------------|-------------|
| INFANCY | 0-3 Years |
| CHILDHOOD | 4-9 Years |
| ADOLESCENCE | 10-18 Years |
| ADULTHOOD | 19-65 Years |

| | |
|-----------------|------------|
| OLDER ADULTHOOD | 65 + Years |
|-----------------|------------|

TASK:

1. Choose a celebrity/athlete/well known person of your choice and write ALL the life stages which they have been through so far e.g. Infancy, adolescence, adulthood etc.
2. You now need to note the significant things that have happened to this individual in each of their life stage.

For example;

INFANCY (0-3 years) started to form sentences with basic words/crawl/walk etc.

ADULTHOOD (19-65 years) married to...had children...

You are creating a sort of Biography of this person with basic information of what happened in each of their life stages. If things happened to people around them such as parents divorced' then mention this but also say how you think this effected the individual.

Good luck and see you in September!
